

Speaker Information

David Rodriguez, B.A, M.B.A. is a technical specialist for Straumann USA focusing on biologics and their effects on oral healthcare. Previously David was owner and President of Innovative Dental Solutions, a dental consulting practice focusing on the identification, application and integration of high technology in dentistry. David has been in the dental industry since 1992 and has held leadership positions with VITA, KERR, and Henry Schein Dental focusing on clinical operations, Prosthetics, materials and dental education.

David holds degrees in Management and Organizational Leadership and has lectured to dentists and laboratory owners alike on high technology in clinical care, digital diagnostics, restorative material selection, value added business strategies and industry trends.

Regenerative Therapies in Today's Dental Practice

Straumann and California Complete Dental Lab

are pleased to present a unique learning opportunity detailing new trends and possibilities for Regenerative dentistry.

Advancements and the continued development of biologic agents are changing clinical dentistry at a steady pace. The addition of new and innovative therapies is sure to affect specialists and general practices alike. Please be our guest for an evening of C.E. featuring an overview of Regenerative modalities, materials and treatment options for common periodontal conditions as well as complex cases. How can the latest in research and development impact you and your practice?

Wednesday May, 25th 2011 - 6:00pm - 8:00pm

California Complete Dental Lab

28316 Constellation Rd.

Santa Clarita, CA 91355

Refreshments will be served and this course will earn 2 hrs of C.E. credit

Please R.S.V.P. to (661) 295-1111
